

## The image contains three detailed technical drawings of a mechanical device, likely a portable sundial or clock, arranged on a single page. The top drawing is a top-down view of a spherical or hemispherical instrument with a complex internal mechanism, including a central vertical axis and various gears or components. The bottom-left drawing is a side view of the same instrument, showing its profile and internal structure. The bottom-right drawing is a perspective view of the instrument, showing its three-dimensional form and the arrangement of its components. The drawings are executed in a fine-line, engraved style on aged, yellowed paper.
