

BOBBY BEARING

THE GAME

Bobby and his family of bearings live in a metallic land of the future inhabited by many traps and fearful black bearings. Bobby's cousin has led his brothers astray in the land and it is up to Bobby to seek them all out and get them all home again. This was the first game to feature "Curvispace 3D" which actually allows the bearings to roll around in 3D space in a very realistic manner. You control Bobby, who emerges from his home and you aid him in his quest for his brothers and his cousin. Bobby has to find each of them in turn and roll them back home. But be careful! Getting past some of the pitfalls will be even more difficult when you are pushing another bearing!

CONTROLS

Use keyboard or joystick. Joystick options are chosen from a menu - use 6 and 7 to move up and down the menu, and 0 to select your choice. Keyboard controls are...

Y to P - UP RIGHT

H to ENTER - DOWN LEFT

Q to T - UP LEFT

A to G - DOWN RIGHT

BREAK - PAUSE

1,2 or 3 - RESTART

The Q key allows you to cheat - you lose points and if there is a brother in the room you lose him and so cannot fully complete the game.
