

power too much whilst in flight or aircraft will stall. Raise/ lower undercarriage using U. To engage/disengage terrain following equipment press T. Restrict your speed to 50% whilst terrain following mode is active to avoid crashing into hillsides. If the SAM warning light flashes press J to activate jamming equipment. When AUTOMATIC LANDING indicator flashes you are within range of an allied airbase. Press L to engage automatic landing sequence. Press L again to abort sequence. MISSION END  
After landing an updated war report will be produced, this should be used to decide your next mission. After deciding on your next mission, rearm and refuel before take-off.  
KEYS  
Joystick can be used to bank left/right dive, climb and fire.
