RALLY SIMULATOR

Rally Simulator is a superb motor racing game with four car opponents and really smooth scrolling. Get ready to roar away from the starting lights, take your opponents with a skilful skid on corners, and refuel and repair at the pit-stops.
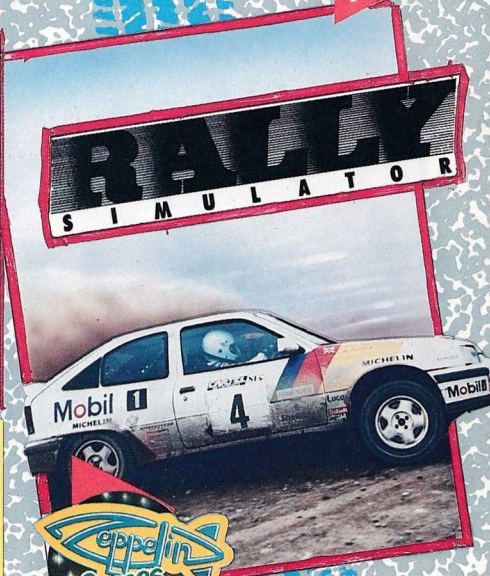

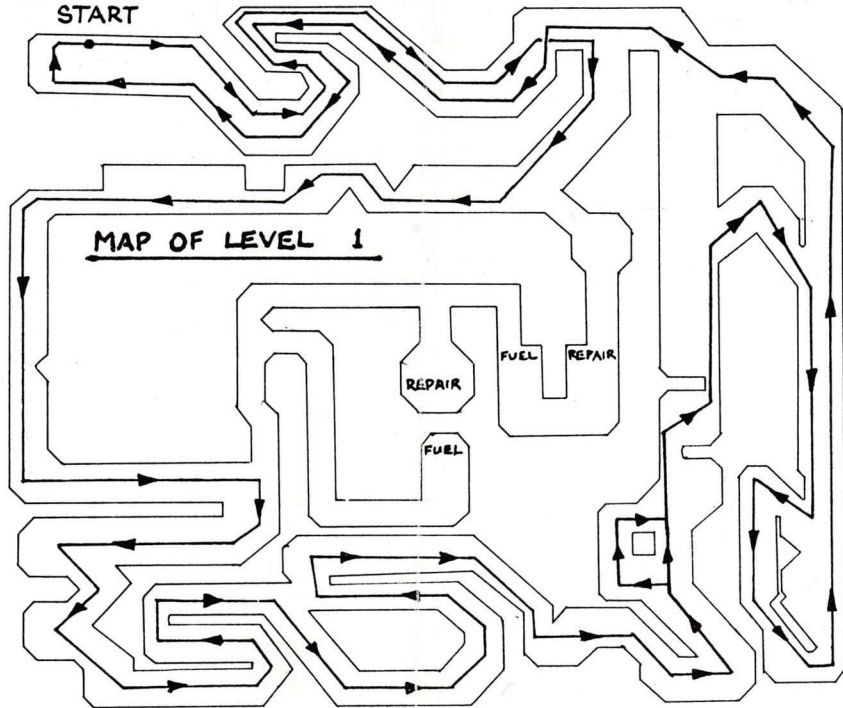

Program Hugh Mo
Made in UK

Before you lies a course that would challenge even the most experienced of rally car drivers.

Tight corners, narrow lanes, other cars, and chicanes all conspire to slow you on your race against your opponents . . . and the clock.

As you pass round the course your progress is recorded on the map, with the first section only half shaded, ready for your return!
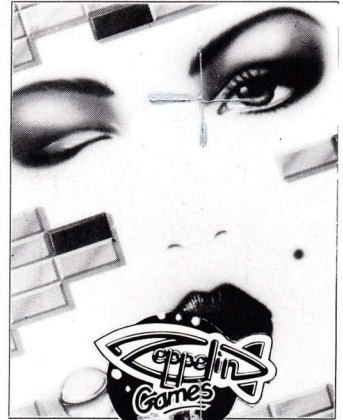

● 3 levels complete ● 3 laps for next level
● 6 and zero for pause/unpause
