AMSTRAD: To FREEZE the game: Press 0 on the numeric block.
SPECTRUM: To FREEZE the game: Press 0 on the numeric block.

Can our Hero overcome the absurd dangers that face him and reach Active Status?

REBOUND HEWSON

The main task would seem to be the extermination of an organism orginally designed to look after the Folly and keep it clean – the Waste ingestion and Janitor Units are not really dangerous but are extremely irritating. On the other hand, the creatures built to guard the place are very dangerous and will attack at every opportunity.

SWEEVO'S energy level can be judged by the expression on the face of the large dial; the Goose that lays the Golden Erg, however, will provide extra energy if he is startled from behind!

The Selector Pulse shows the position to be occupied if an object is picked up or the object to go if it is dropped.

Scoring is very complex and largely irrelevant, but remember that for SWEEVO to reach full Active Status, all other organisms must be eliminated.

Oh, and beware of the fruit!
