

## AMSTRAD

### OPERATING MODES

In the MON mode, an operator may view a site's internal monitoring system. In CAM mode, the operator may also view individual cameras independent of its monitoring system. The VTR mode allows for playback and analysis of all the site's recorded activities.

The BYP mode enables an operator to intercept an internal monitoring system and substitute its current channel with a taped image corresponding to the same channel. Finally, the TGS and MRU modes provide information concerning the relative displacement and disposition of hostile counterintelligence forces, and allows command and control over friendly intelligence elements.

#### ADJUSTING VERTICAL HOLD

Sometimes the vertical hold must be adjusted on a display. To do this, perform the following procedure:

1. Press the SELCT pushbutton to select the desired display.
2. On systems equipped with a joystick:
  - Move the hand cursor to the VHOLD pushbutton.
  - Press and hold the joystick control button.
  - The VHOLD is highlighted.
  - While still pressing the joystick control button, move the column forward to control the rate of bottom-to-top vertical roll, and back to control the rate of top-to-bottom roll.

#### MONITORING

Monitoring takes place in two modes: viewing of a remote site internal video security monitoring circuits, and viewing elements of those circuits independent of the site central control.

#### Viewing Security Monitors.

To gain access to internal security monitors, perform the following procedure:

1. Select the desired display monitor on the MFSM.

### SELECTING DISPLAY

To select a display, press the SELCT pushbutton. The channel indicator for the next display in a left-to-right, top-to-bottom order will immediately flash. The channel number is changed by pressing the + or - pushbuttons.

#### ADJUSTING VERTICAL HOLD

Sometimes the vertical hold must be adjusted on a display. To do this, perform the following procedure:

1. Press the SELCT pushbutton to select the desired display.
2. On systems equipped with a joystick:
  - Move the hand cursor to the VHOLD pushbutton.
  - Press and hold the joystick control button.
  - The VHOLD is highlighted.
  - While still pressing the joystick control button, move the column forward to control the rate of bottom-to-top vertical roll, and back to control the rate of top-to-bottom roll.

#### MONITORING

  - Press and hold the joystick control button.
  - The VHOLD is highlighted.
  - While still pressing the joystick control button, move the column forward to control the rate of bottom-to-top vertical roll, and back to control the rate of top-to-bottom roll.

Monitoring takes place in two modes: viewing of a remote site internal video security monitoring circuits, and viewing elements of those circuits independent of the site central control.

To gain access to internal security monitors, perform the following procedure:

1. Select the desired display monitor on the MFSM.

When a channel is set for display, the taped material is transferred from a special buffer. When a display on the MFSM has been selected and the VTR pushbutton has been pressed, the VTR will then function in a manner similar to normal analog devices. The display status indicates "TAPE" when the VTR is active.

**Viewing Independent Cameras.** Individual surveillance cameras at the site can be isolated for viewing. To view a separate camera, the appropriate channel for that camera must be activated. Perform the following procedure:

1. Select the desired display monitor on the MFSM.
2. Press the CAM pushbutton.
3. Verify that the monitor status display indicates "LIVE".
4. Press the + pushbutton to increment channels and the - pushbutton to decrement channels.

**Video Tape Recorder Operation** The Video Tape Recorder mode of operation is useful for display and analysis of pre-recorded activity. Recording is continuously automatic, so there are no provisions for "recording" and independent event, as with a standard VTR.

**INSTRUCTIONS DE CHARGEMENT** When the Telemetry Guidance System screen is present on any of the MFSM displays, all pertinent information regarding active cameras, site personnel placement, navigational information, and MRU location is provided. To display the TGS screen:

1. Select the desired display monitor on the MFSM.
2. Press the TGS pushbutton.
3. Verify that the monitor status display indicates "TGS \_\_\_\_\_". The current direction of the MRU is shown in the space after the dash.

**GERMAN AMSTRAD HACKER II** Dokumente der höchsten Sicherheitsstufe, sicher weggeschlossen in einem russischen Safe, geben den Sowjets die Macht, die Welt zu zerstören. Die einzige Möglichkeit, den Weltfrieden zu bewahren, besteht darin, mit Hilfe ferngesteuerter Roboter in die russische Basis einzudringen und die Papiere zu stehlen. Der CIA hat Sie für diesen Job angeheuert.

**LADEANWEISUNGEN** 464: Appuyez sur CTRL et la petite touche ENTER. 6128: Tapez | TAPE et appuyez sur RETURN. Appuyez sur CTRL et la petite touche ENTER.

**INSTRUCTIONS DE CHARGEMENT** Sur les systèmes munis de manche à balai:

1. Note that the TGS status display indicates the direction (EAST, WEST, NORTH, or SOUTH) the MRU is facing.
2. Move the column to the left to turn the MRU to the right, and to the right to turn the MRU to the left.

**GERMAN AMSTRAD HACKER II** Dokumente der höchsten Sicherheitsstufe, sicher weggeschlossen in einem russischen Safe, geben den Sowjets die Macht, die Welt zu zerstören. Die einzige Möglichkeit, den Weltfrieden zu bewahren, besteht darin, mit Hilfe ferngesteuerter Roboter in die russische Basis einzudringen und die Papiere zu stehlen. Der CIA hat Sie für diesen Job angeheuert.

**LADEANWEISUNGEN** 464: CTRL drücken und die kleine ENTER-Taste.
