

## **NORTH SEA BULLION ADVENTURE**

### **Hints for Playing**

Commands that can be used: BUY, LEAVE, ENTER, SURFACE, WEAR, USE, GET, TAKE, CLEAN, SEARCH, LIST, LOOK, AVOID, READ, OPEN, CUT, REPAIR. Consider also: AVOID, CLEAN, REPAIR and 'R' (Return) which returns you from the Input Screen to your location.

You will need the following items to succeed in your quest: STEEL PLATE, OXYGEN, FUEL OIL, SPEAR GUN, DIVING LAMP, GAS TORCH. Buy these items carefully before setting out; the Return key can be pressed the desired amount of times on one entry (i.e. for 3 tanks of oxygen type 'OXYGEN' then press CR 3 times. Note that in addition you have an unlimited supply of batteries on board for your lamp.

You can mark a location with a Buoy, (also on board), which will only appear at the last location in which you leave it.

If No 1 engine stops, this will be caused by fuel starvation and can be remedied with the correct command.

Keep a careful eye on temperature as below minus 20 kills; surfacing will warm you up.

Watch your air supply, battery power and fuel or you will be in trouble.

The end of the game is left up to you, the captain, to decide. It may be when you have discovered the strong room and returned to your ship with a gold bar, or you can carry on removing gold bars one at a time and see how many you can recover, perhaps also returning to port with your fortune.

Lastly, do not be afraid to save your game if you feel that danger is threatening. The SAVE and LOAD facilities are there to increase your enjoyment of the game and prevent you losing many hours of adventure unnecessarily.
