"GET DEXTER!"

The year is 2912. The war on Earth is escalating beyond control. Throughout space the colony planets are worried. If the Central Galactic Control Computer on Earth is destroyed all life on the planets will perish with it.

The Council of Sages have given **DEXTER** (an android expert in dangerous missions) and **SCOOTER** his trusty Podocephalus, the job of infiltrating the computer centre and copying the memory in order that Galactic life can continue.

The richness of this game, its high resolution cartoon quality graphics, its 50 different rooms and the exceptional speed of both the 3D animation and game play will leave you breathless!

GET DEXTER! is an ERE INFORMATIQUE game produced under licence in the U.K. by PSS.

"THIS GAME IS SET TO BE A MASSIVE HIT – GRAPHICS AND DESIGN SUPERIOR TO ANYTHING ELSE – VERY FUNNY TOO" AMSTRAD ACTION MARCH '86.

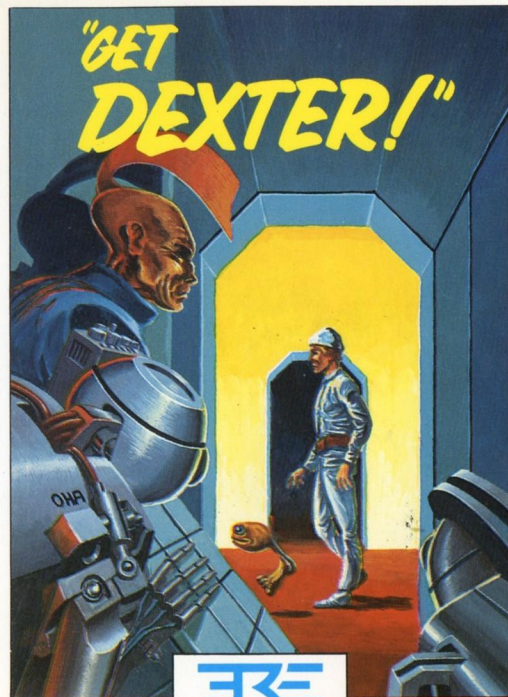

The French version of this product is titled "CRAFTON & XUNK".
