chronicles of
NANAKO

Nanako in Classic Japanese Monster Castle is a puzzle game where you must literally "build yourself" a path to the top of the screen in order to progress. This is achieved thanks to Nanako's ability to carry wooden boxes and drop them to create this pathway out but only one at a time. There is 25 levels in total with increasing difficulty.

To make your life a little harder, there will be Karakasa roaming each level, as Nanako you can walk on top of these umbrella-shaped monsters and use them to jump higher which is key in some levels, but if the Karakasa moves and you fall, you will lose a life, so whatever you do, be careful. Another ability is being able to drop boxes in the middle of a jump, this will appear to be suspended in the air. Whoever masters the art of making the box appear at the height of the jump will find it much easier to reach the top of each level and advance in the game.

A password feature is also in use to allow you to quickly return to a previous level when starting a new game.

Loading Instructions: Type "run" and hit ENTER. Press PLAY on tape and the game will load automatically. (for both games)

Keyboard Controls:

← LEFT = Cursor Left

→ RIGHT = Cursor Right

↑ Pick Up a Box = Cursor Up

↓ Drop the Box = Cursor Down

SPACE TO JUMP

(R) Restart Level (you will lose a life)

Nanako in Classic Japanese Monster Castle

chronicles of NANAKO

Nanko Descends to Hell After successfully rescuing her younger sister from Monster Castle, Nanako thought life would return to normal. She was wrong. With her village under attack by malevolent forces, Nanako seeks out the Oracle for counsel and learns that in order to vanquish the evil from her village, she must retrieve four pieces of ancient artifact...from the depths of hell! Can you make it out alive and restore peace to your home?

The Game:

Taking control of Nanako with four-way directional movement, you will have to locate the four pieces of the ancient artifact and return to the first screen to complete the game. The following items will assist you:

Holy water: Offers temporary protection against collisions with monstrous enemies. **Scissors:** Used to cut iron walls. Action is performed by holding the direction button towards the wall and pressing FIRE. **Axes:** Used to chop trees. Action is performed in the same way as the scissors. Nanako's inventory is limited to 4 slots with items being collected by simply approaching a container. You can cycle through held items in your inventory and place those that are not needed in the container.

Loading Instructions: Type run" and hit ENTER. Press PLAY on tape and the game will load automatically. (for both games)
