

[Game instructions]

Tankz has been designed for the Amstrad CPC 464 and tested with it. By running the game it will start showing the main menu that will indicate player have to press the Space key to play the game.

When you start playing the game it is in easy mode, as you eliminate tanks you add score, when you reach a certain score the reappearance time of tanks decreases, also if you reach the final level, all tanks will have the maximum speed, unlike the principle that is random. You win when you reach the required score.

[Controls]

You dispose of a canon to eliminate the tanks, to move the canon up you press W, to move the canon down you must press S. For shooting you have to press the D key.
