Please ONLY PHONE NIGEL on a
FRIDAY EVENING untill further
notice.. Ta:

Due to Ian having to attend
college by day and having a lot
of homework to get through in his
spare time... Please expect to
wait a little longer to receive
any ROMS ordered. Ian will
endeavour to compete your order
within TWO WEEKS.

*** YOUR INPUT ***

If you think you can help other
CPC'ers, be it BASIC programming
or stripping the CPC down and
putting it all back together
again (with NO SPARE BITS) or
anything in between, then drop me
(Dave Stitson, the Ed) a line.

*** WRITE AWAY ***

As in do it today.

On the same subject of helping
other CPC'ers, if you want to put
pen to paper and write a review
or an article for CPC South West
let me know. Apart from a topic
all you need is a CPC, so what's
stopping you ?

THE EDITOR SPEAKS

The Bit No-one Reads

A HAPPY NEW YEAR to all CPCSW readers,yes I know that I am a little late,but as this is our first issue of the year, I thought it was a nice way to start the bit (**THAT NO ONE READS**).

I do hope you all enjoyed the festive break, I was glad it was over what with having two grandchildren around me, I needed a week or two to get over it, did you all get what you wanted for christmas ?,I shall be OK again for socks etc,**NO CPC ITEMS** though.

Following Andy's information in the WACCI magazine,(About 6128's for sale at a local surplus store). just before christmas visited there to see what they had to offer,there was ONE left,I asked for it to be plug'ed in to enable me to try it out,I was hoping it would have been a 1988 model one,but no it was a 1985 (6128) , a bit grubby,so I asked the price THIRTYSOADS came the reply,WHATISAID,for an old 1985 model,NO said me,it's only spares value,What will you offer me the man asked ?.TEN say's I,make it FIFTEEN and it's yours say's he,so I now have another 6128,with a colour monitor.Andy I think you parted with your cash to quickly.

Has anyone got any ideas about the next CPCSW get together yet ?.Please feel free to make suggestions as to the venue and time for it to take place. There is not a lot of time left to plan and arrange Venue's,so please send in your suggestions.

I would like to see **MORE** members sending in letters-articles this year,as I have said before, any little tip may solve a problem for another member,and what about the **COMPETITIONS** ?.I am sure there are members who can put together a competition,and may be even donate a prize or two,Tapes,Disc's,Hardware,cash. I would offer my body but I doubt if anyone would enter for such a booby prize.

It has been asked that the date (MONTH)of each issue is put on the cover,so I sent to John the request as it is John who puts the front cover together as well as the (COVER DISC),at the time of writing this I hadn't received the cover page from John,so I hope it's there for you to file in issue order.

That's about it from me,enjoy your read.

DAVE >>>...

HAPPY CPCing for 96.

Reader's Letters

The Place To Have
Your Say.

Dear Sir, Madam or Other,

Hello from the **'NO PUB'** area, (just spent the day knocking up 40 pints of the **'REAL ALE'** type of bitter for the summer, Test in about a months time, will it last that long. Dave))).... To you and your **BOSS** name unknown, a very happy new year to you.

BUSINESS SECTION..... A copy of the **'huck-sha'** software please when time allows....Enclose another **WINNING ENTRY** set for the comp!.....

DON'T you dare even **THINK** my entry is too late !!!!The **ROUTE PLANNER**

we found to be right **'AWKWARD LITTLE THING'**, but **WE DID IT**. (well the comp anyway !!!!). train of thought continued in next paragraph....or later on.

BUT before that...again **HELP**...Lottery predictor problem. (look at my reason for it Dave))).... Always **ME** !!!!Line 70 shows as containing a fault, any ideas ???.(no fault's in this line Owen-Dave))).... it's listed as follows. 70 IF n(b)=1 THEN GO.(magnafying glass on it's way to you Owen).the same problem turns up time and time again.
ANSWER..NO CROWS LEFT..., well there ain't when I shove some

lead up Magpies bum, when they turn up in my ground !!.

Being one of your more **'SENIOR'** (old) members I have No wish to type the first word of the first paragraph, Top R/H side of page 18. **'BUT'** however, it does seem to jog the memory from distant past !!!!**'I THINK'**.

After deep reflection and due consideration, I must simply say.....**DAVE ...SEND DOWN A COPY PRONTO...PDR...IMIATLY**...it may neutralise all the **BROMIDE** taken o v e r t h e years...**'THINKS'**.....Where do we get a copy of the **GERMAINE** disc??? Any Ideas? **YES** send by return..IA.

Thought I'd better check up that your reviewing is up to standard, but unable to carry out the project without Progs:::

(how's that for an excuse for needing the disc).without admitting being a **PERV**:::

After all I understand they all live in **PLYMOUTH AREA**

The **PROCLIP-COCWSM** looks as though it could be useful sometime....So may I have a copy ?.

That's it for now, Many thanks once again for everything, see you sometime.

Best Wishes

FROM 'THE PUBLESS WONDER'!!!!

OWEN.....

The Place To Have
Your Say.

The Cave Dweller Writes

Back in the mists of time the Tape to Disc Transfer routines were written by a person named Colin Harris (BONZO) with the additional help of a few others specially Jason Brooks (The Argonaut), and thus the Discs (BONZO UTILITIES) came onto the market with the Database being updated regularly by Nigel Mells. Colin Harris decided to keep his customers informed by BONZO'S NEWSLETTER about all the transfers discovered, together with any special loaders or new routines that needed to be added. When Colin Harris moved to Canada, he transferred the rights to the Bonzo DISCS to Phil Craven. However the newsletter was covered by Carl Surry in PLAYMATES. When Playmates went down, Martin Cossins continued the LETTERS under the NAME of BONZO'S SCRAPYARD for a long time. Sadly Martin's Amstrad finally gave up the ghost and he decided to go the way of the Amiga. About the same time Phil Craven, who had supported the Amstrad very well up to this point, was having problems with his company and the Bonzo Discs stopped. Seeing as the newsletter only costs a return paid envelope + 2 extra first

class stamps, it is a very valuable service to anyone trying to transfer any tape to disc, specially with low availability of new disc programs. To date over 1500 transfers have been obtained, either by the Bonzo Discs, Special Busts or other utilities made available through the Newsletters, eg Jason's 8k special Disc and the Bankraid Disc to name just two.

From THE TROC

The above letter arrived a short while after I (John) reviewed Bonzo's Newsletter, the people concerned don't like their Newsletter being called a fanzine. (Quickly, get last issue and see where John slipped up... Dave). So, Bonzo's Scrapyard is a Newsletter not a Snooze-letter nor a 'zine. Personally I think once a publication stops being a one man show and takes on various subjects other than the original theme it becomes a fanzine. But what I think is neither here nor there, we could have a debate on the subject, drop Dear Dave a line. While I'm here, the graphics on Noom (B side of CD 4) only work on the A drive, so if you want even half a chance of completing the adventure you'll know what to do (hint). Till next time, I hope you all have a CPCing 1996... John R.

Reader's Letters

The Place To Have
Your Say.

Dear Dave.

I did intend to get lots of bits and pieces done on my little Ammy over the festive period, but what with Mince pies in one hand and a glass of Beer in the other, I didn't seem to get around to doing most of them.....oh well that can be my New Year Resolution then !...

In-between all the revelry (good word, spelt right ? YES Dave)))...), however, I did manage to squeeze out the following snippets for the group.

Enclosed are my entries to all the competitions in the 'XMAS' special issue, some of the 'ANAGRAMS' for the "ROUTE PLANNER" were too hard for me, it is a good job I have an intelligent wife. (the amount of entries I received, I began to think that I set it to easy Dave)))...).

There is a list of 'KEYPRESS' game cheats from the 'HPOSPFKAAA', (huge pile of sorap paper formerly known as amstrad action). the list is not exhaustive, so you may get another installment in the future.

NOTE: if you want a copy of the game cheats, send me (ED:) an A4 SAE, there are just too many to type in.

Thanks for printing my programs in the 'XMAS' issue, (I did put a typing error in the Lottery program, I tried to win it all my self Dave)))...)

I am flattered that you printed them all at once, you will be pleased to find more programs enclosed, these programs are as follows.....

1.DISC EDITOR

A mini program that allows you to 'Load' 'Erase' 'Re-Name' 'Run' and even load in Erased Files.

2.WEIGHTS & MEASURES

Converts metric to imperial and vice versa.

3.MAGIC TRICK.

Think of number from 1 - 255, then follow the screen prompts, your Amstrad will read your mind. -Paul Daniels eat your heart out !!!!.

4.ANAGRAM HELPER.

A short program to help you to solve Anagrams.

5.MINI WORD PRO.

A Very Very short letter writing program, just type your letter and press ENTER at the end of each line to send it to your printer.

6.LOTTO.

A very Very short 'ONE LINE' lottery predictor.

Thanks David, your programs are published, Dave)))..

Reader's Letters

The Place To Have

TO HE WHO KNOWS THE LOT

FROM HE WHO KNOWS BUGGER ALL
AND LIVES IN THE PUBLESS AREA

Dear Dave...Fooled you!!!He
thought he had heard the last
from me for another month or
two...HOW WRONG CAN ONE BE
?????

A couple of points I missed out
on the disc that I sent you, to
start with. To save searching
for bit's and pieces (I'm a
lazy sod) * could either the
issue month or an issue number
be added to the front page
???.(OK!!! I KNOW I COULD WRITE
THEM ON, but see above
).....

(your wish is our command
Owen, from this issue, John will
put the issue month on the
front cover)...Dave)))...

These competitions are really
good in fun and a CHALLENGE
..However, after spending simply
hours entering (and winning
some times--hint !!!).would it
be possible to have the correct
answers printed in the ensuing
magazine ?. I have no doubt
that many wives or partners
would feel happier and more
importantly...SAFER.....

You wish has been obeyed again
OWEN...last issue answers
somewhere in the magazine.....

THE NEXT CONVENTION, YES as
already said, there must be one.

When does not particularly worry
me being a Knackered Early
Pensioner, a very loose suggestion
would be for it to be held in
OCTOBER, This would give a little
more daylight for the long
distance travellers, (and
possibly a little more cash
spare, prior to the christmas blow
out to spend on goodies)....

At the last get together, being of
a very generous nature (and
mature liar !). I left a comp
prize that I won (a 3" drive
belt kit I think you said it was
)...if you haven't used it as a
prize yet, I have decided to get
my own back and devise a ' VERY
NASTY COMP' for you to use if the
nerve prevails...(see comp pages
) OWEN) Dave)))....

There you have it.(WHY ME ?
say's Dave). Now you have a go
since I recall in numerous
reports that you are classed by
yourself as a genius...PROVE IT
!!!...Did I say that ????? Dave
)....

That's your lot for now....THE
GOOD NEWS.....I have done.....

Cherio.....OWEN.....

Yes Folks, ' OWEN'S ' comp is in
this issue

Reader's Letters

The Place To Have
Your Say.

Dear Dave..

Would you through the magazine, thank Brian Furse for the PRINTER that he gave me at the convention. A very good friend has got it working for me, I don't exactly know what the fault was on it, but all's OK now, again **THANKS BRIAN.**

JAMIE.....

*That's what a **USER GROUP** is all about, Friendship, Sharing etc.Dave>>>...*

Dear Dave.

Thanks for the phone call the other evening, you mentioned something about DAVID HALL wanting ideas for programs, well, I don't know if this can be done or not, but as I mentioned to you, I purchased " SUPER LABELER ", it takes up to much time in sorting out the codes etc for my liking. Now, I have a little PD LABEL program, it works just fine , but I wondered if 'DAVID' could put in a patch that would allow me to use the colour print with it,.

Dave the ED here, I expect that that would be breaking any copy write on the PD program, NOT SURE, but I will throw it open to David..Dave>>>...

Arthur, Why not get in touch with David direct, you never know, he may have a similar PD Colour Print Label program.

LETTERS WANTED - DAVE >>>>.....

MAKE MUSIC WITH SIMON

Part 5 But how do I compose a tune?

Well how do you compose a tune? I can't really tell you exactly, as this is really a complicated subject to explain. But I'll try to give you some usefull pointers. So if you'd like to fire up your Music Package, or just come along for the ride

Firstly you'll want some instruments ... At this point I would suggest that any good instruments are kept saved on a seperate disc. This means when you have a good idea, you can try it out quickly. Instead of having to design instruments first. You'll also want to decide how fast the tune will play, although this can be changed at any time so not to worry for the moment. You'll also want to decide how many positions are in a pattern. You'll learn to judge this with experience.

The Melody ... If you think that you'll forget the melody then get it down! But most of the time, you'll probably want to place a percussion sound every 5th position in another chanel (starting at 0 then 4,8,12 and so on). This will help to get the timing of the melody correct. If the melody doesn't fill the whole pattern then either leave it, or improvise the last bit so it links with the beggining of the melody. O.K. so you've got

the melody timed now.

The Bassline ... This will balance out the melody, giving both depth and extra rythm to the tune. But be carefull that you don't over-do it. The Bass line can be fast or slower than the melody itself. It's up to your discretion. It can also either be as loud and important as the melody. Or, can be subtle and seem to play in the background.

The Harmony ... This will complement the Melody. It could be like another melody in itself, running along side the original melody. It could have distintcive rythm of its own, rather like the bassline. Or could be played using a repeating Arpeggio. But the Harmony will always accomanie the Melody wether it's an off-shoot of the melody or something totally different.

The Percussion ... Drum rythm will add a touch of Drama if used carefully. The rythm also obviously holds the tune together. Although is not absolutely essential. I'm sure you've heard game tunes that have no drums at all!

NEXT PAGE PLEASE.....

MUSIC WITH SIMON CONTINUES.....

When I write a tune, I always stop and listen to the pattern I'm working on. Often many times, before it sounds write, generally polishing it off. Once I think it sounds reasonable. The same process is carried out for the next pattern and so on. Always trying to take the tune a stage further, while keeping each pattern close to the others. It is quite easy to get the first pattern done but not so easy to carry the tune on. But practice helps a lot, so do persevere! It will all be worth it.

It's very important to have an idea of where the tune is going. After writing the first pattern ... the tune could take a real twist, or continue along the same lines as the previous pattern. You could write the whole tune on a Verse & Chorus basis. Having a common Chorus pattern after each main part of the tune.

On the Coverdisc is a tune for loading into the Tracer 'MTP5C' The Melody is on channel A, Percussion & BassLine on channel B and the Harmony on channel C. So just switch off some channels if you want to listen to a single component of the Music.

Well, I've given you some pointers. It's up to you to have a go now. If you do have any problems then give me a wring. But bare in mind, Music is what you make it. And requires some thought, So don't expect to write a track in 5 minutes. But, do expect to have a lot of fun listening to the end result.

Hope you'll join me next month for the 'Tips & Tricks' part of the tutorial Simon

Thank's SIMON for your article once again, But SIMON is a little disappointed that NO ONE has phone him or enquired about his article.

*I am sure there must be someone out there who would like to write a tune on their CPC, Go on,give Simon a ring or drop him a letter.
You can phone him on....*

£5.00 MAX

DONUT MAG - DISK PD

SLICE

The problem with reviewing disczines is you tend to get carried away with special effects the coders add in an attempt to go one better than their counterparts. Rasters, split screen, tunes etc seem to be more important than the written word. At times you think you are looking at a demo rather than a fanzine.

Compared to the euro-zines DM is a bit like going back into the dark ages in that there is no gimmicks, not even a decent menu system. But it does have the major ingredient - tons and tons of text.

The topics range from Slice's A-Z

on how to destroy your CPC (quite funny in places) to a BASIC tutorial by Malfunction

(Malcolm Dowse) with the odd re-published articles by other well known programmers thrown in for good measure. Mostly everything is written on the lighter side, verging at being humorous. Two things let this 'zine down, the non-existent menu system and Slice's bad jokes, I'm not saying which one is worse. Price wise, I would say it is absolutely FREE but there is always the copy charge, 10p from DISK PD.

Overall 59%

SPRITE GET - CPCSW PD

FRAGGLE & DUCK

Demo making made easy or what? With next to no programming ability and this graphics converter you can create a demo like the Black Mission one or add a touch of movement to your loading screens, as I have done with this issue's CD.

SPR-GET uses screens created on an art pack to produce sprites, this is fairly easy to do but you have to get the size just right else the end result looks out of focus.

For me this type of program is what computing is all about, getting the beast to do what I want it to, even after all this time I still get a buzz out of it. SPR-GET is no good for making games, but great for non-programmers who want to put a simple graphics demo together.

The programming side of things is dead easy, using the memory locations and sprite dimensions (given in SPR-GET) you move the sprite around the screen, easy enough but no $X=X+1$ allowed. Major downer, NO INSTRUCTIONS included in this package. But anyone interested can always drop me a line.

There is an option to allow the user to convert a whole screen into a sprite but this took so long I binned the idea, maybe one day I'll try again.

Overall 65%

PMS Continued....

TETRIS95 - CPCSW PD

NASTRIOTTIS CHRISTOPHE

Many thanks to Simon Crump for sending me this game, Simon loves Tetris games. And who could blame him, they are addictive as hell.

When first looking at Tetris95 I was quite impressed, nice opening screen (overscan) and loads of options including two player mode. Unusually for me, I got bored with playing it after only a few goes. Compared to others Tetris95 starts off too slow, and you have to keep pressing the direction keys to move the blocks, unlike others where you just hold down the arrow key.

The two player option is a waste of time in my opinion, there is no split screen which means players have to take it in turn, admittedly you aren't put off by what the other player is doing but for me that's half the fun.

Tetris95 will be okay for newcomers to the game because it is slow but more experienced players will find it far too dull and sloooow.

Overall 45%

BIRTHDAY - CPCSW PD

JOHN JONES

Here's a nice little fun program, after inputting todays date and some personal details it will tell you such things as how old you will be in the year 2000 and what day of the week your next birthday falls on. If you time it right it will even play a tune to you, how sweet.

Overall 80%

MODE 2 DESIGNER - CPCSW PD

RICHARD FAIRHURST

This one takes me back a bit, it was the first ever drawing package I used on this beast of mine, later on I moved onto Rob Buckley's Smart2 (those were the days). Mode 2 designer as you may have guessed only works in two colours, but it has most if not

Just 4 Fun

Last issue's little brain teaser (and I mean teaser) was a question on maths, to put it simply a farmer shoots one out of a flock of crows, so the problem would look something like this : $20+5-1=0$ Why zero, because the rest would fly away.

As the heading states, this is just a bit of fun. Now you know what we are dealing with here's another taxing puzzle.

Jack and Jill have 4 daughters, each girl has a brother. Including the parents, how many are in the family ?

MODE 2 DESIGNER continued.....

all the options you'd find in a commercial art pack, including AAS. Obviously you can only use the foreground and background colours but you would be surprised what you can put together with this one, you're not just limited to clip art. The only downer as far as I'm concerned is the screen clears when you look at the help screen, but to get round that you just have to jot down all the commands, there's a lot of them. The paint and fill options are a tad slow, but apart from that this package comes highly recommended.

Overall 80%

GERMAINE 1 & 2 - DISK PD

GILES

Germaine is a short and rude little demo (over 18's only), a waste of the coder's talent but well drawn and animated. The main theme is oral (you mean they're talking.... Dave) but there is another screen which shows various other positions to be released at a later date, personally I doubt if they will ever appear as this is a very old porn animation and none of the others has appeared so don't hold your breath.

Overall 85%

The above demo is very explicit so please DO NOT order it if you are easily offended, so detailed that Paul requires proof of age before letting you have it. If you do order it please keep the disk stored in a safe place, out of the reach children. Yes it's that bad.

You will find the name of the P.D. library which donated the software to Pocket Money Software by the title, here is a list of P.D. Libraries you can get software from, drop them a line and see what they have to offer.

DISK PD. PAUL has wrote to me to inform me of his closing of the library.

HI DAVE !

I have sent you a few more small programs to possibly publish in a future issue of CPC SOUTH WEST MAGAZINE.

As usual they are short and easy for members to type in. and they are of much use to LEARNER BASIC programmers.

The programs are self explanatory when run,but for you DAVE and any other member,here is a quick run down of what each of the programs does:-.....

1...SNAKEBYTE - Dodge the on-coming objects for as long as you can.The game is very fast and colourful.(controls are by left and right cursor keys.

2...SEQUENCE REMEMBERANCE TEST - Using this program,the user can test and IMPROVE the performance of his/her own memory by trying to recall an increasingly longer chain of letters.

3...DISCO FEVER - This is a shorter and better version of mine published in 'Amstrad Computer User'. The program is a jazzy disco lights simulator,switch off the lights and turn up the stereo on full.

4...QUIZ MASTER - A simple quiz program,I have only included 3 questions.many more can be added:either serious (could help with exams) . or silly one's. (good for parties).

next page.....

```

Well that is it for this issue folks,Not only have I typed the programs in here, I have typed them in and saved them to try them out, and I must say the last program is very handy in deed, How many times have you erased a file when you didn't mean to ???well this Disc editor works well in listing the erased files on the disc (providing itthe disc hasn't been formatted),you can then give it a USER 0 to bring it back again.

Thanks David,these little programs will keep the members quite busy,and they are very appreciated by all.

Dave))).....

David did send another LONG TYPE - IN, but I will keep that one for another issue.

David has asked . ' ARE THERE ANY SPECIFIC PROGRAM TYPES ' that we would like for David to compose a miniture version for the magazine, David say's he will give it a whirl !.

If you would like to see a specific program, why not write direct to David, and he will ablige if possible.

Many Thanks David for your programs... the ED.....

HERE'S THE NEWS !

FROM 'DAVE CALENO - BONZO'S SCRAPYARD', Ex NEMESIS-MICROSTYLE CPC programs. IE.....

BONZO SUPER MEDLER

BONZO HACKPACK

BONZO BLITZ

BONZO FLASH PACK

BONZO BIG BATCH

MAXIDOS & PROCOPY

MS800 large disc format program.

ALL OF THE ABOVE SUITE OF PROGRAMS have been kindly entered into the PUBLIC DOMAIN by Phil Craven.

These are now available from your own PD library.

For those of you who do not know about 'BONZO'. They are all good tape to disc transfer programs, sprite desingner, pools predictor, database , etc

The above programs can also be obtained from :::::

DAVE CALENO
BONZO'S SCRAPYARD
29 CHAPTER ROAD
STROOD, ROCHESTER.
KENT. ME2 3PX.

You can also get from DAVE " BONZO'S SCRAPYARD "

Phone Dave on (01634 - 724262). for details

Thanks for the information Dave- Dave)))....

THE POKER'S UTILITY

BY PETER.

First of all, a BIG THANKS to 'JR' (BARNSTAPLE), who sent me a copy of "COMPARATOR" which made my Christmas and Birthday.

I have tried the program out, but to comment on it now would be unfair as I need to give it a full trial. The early indication's are that the MFSEARCH I mentioned in December's issue of CPCSW, it's better and easier to use.

For this issue, I am going back to "TEARAWAY". Yes I know I am bias to 'Tearaway', but it is a Utility that any 'POKER' should have. A FREE PD version is available fro U.A.U.G. (cut down version), or you purchase the full program from JAMES VERITY. CPC NETWORK.3 THE COTTONS. OUTWELL WISBECH. CAMBS. PE14 8TL. <<that's the commercials over- Dave>>...

To use 'Tearaway', you need a MULTIFACE to load it into, a menu will then appear, chose your needs, IE: CUSTOMISE your TEARAWAY DISC OR INSTRUCTIONS. 'Tearaway' loads into the extra 8K of RAM in your Multiface, if you chose to load 'tearaway', you will get a message to say it has been installed, if it states M/F missing, try again.

Now load in your game (o's) program that you wish to have a look at, press the 'STOP' button on your M/F, instead of the Multiface menu, the Tearaway menu of prompt's by using keys 'A' - 'K'.

Here is a quick 'RUN DOWN' of the keys.

'A' returns you to the program at the point from when you pressed the 'RED' button on the M/F. Same as the 'R' on the M/F menu.

'B' toggles your printer ON/OFF (screen or printer).

'C' displays Decimal / Hex-Decimal.

'D' disassembler (say no more).

'E' memory dump (ditto).

'F' poke, alter address to be poked (like M/F toolkit).

'G' search * important to us 'POKERS', it puts us into another menu.

'H' information (self explanatory).

'I' graphic's dump (dumps memory as graphic's image.).

'J' memory copy (again other utility disc's have this).

'K' editor (need I say more)

If you want more information about game POKER'S. Please contact PETER ON THE HELP LINE or send an S.A.E.

next page please.....

NO POKING HERE.

POKE with PETER.

You will find the utilities mentioned on other 'utilities disc's', but 'tearaway' was the FIRST and BEST, and it is still very easy to use.

Now let us go back to the 'OPTION-G-KEY', by pressing 'G', you are presented with the 'SEARCH' menu..... 'A - F'.

- 'A' return to main menu
- 'B' input string (Hex-bytes)
- 'C' input string (characters)
- 'D' input null (Hex-byte)
- 'E' input null (character)
- 'F' start search

For US M/F POKERS, we use the 'b' & 'c' (h) to input code to look for such as 3A, 00, 00, 3D or D6, 32, 01, etc or 'option' 'c' and input as GAME OVER. or 'END'. Then press 'F', and Tearaway will search through memory from 0000 TO FFFF and display all addresses where input for 'b' or 'c' occur or 'string not found'.

Now anyone newer to the 'POKING' game, if you use option "C". and look for 'Game Over', Tearaway looks for this and will come up with an option of addresses (Hopefully - say's He). This is not where to 'POKE' around, you must look for an earlier call or 'LOAD'. You must make a note of where the address of GAME OVER started for example '9988' you then ask Tearaway using option "B" to look for CD8899 - or 3A8899. *****NOTE***** an address in code is reversed, so 89988 is shown as (88.99). CD in code is 'CALL' and 3A is 'LOAD'. Tearaway will come up with another address to 'POKE' around. *you did remember to use the right CAPITAL or small*

letters when using option "C". Tearaway will only look for what it is told, if in doubt, use **SMALL** capital letters.

Again if you are NEW to this 'POKING' game, and using option "B". use some of the given values that I gave in the last issue of CPCSW, to have a look around with. When you have your address that you want to play around with, 'PRESS' "A". You will be returned back to the MENU, press "F", and put in the address that you wish to 'POKE', use 00, (always a FIRST safe bet), *you did remember to NOTE the original value didn't you ??????* Now press "A" and back to the game to see what happens.

Infinite Lives, Ammo Etc. (*NO, never mind, try again*).

On pressing "H", you are given a 'menu' to play around with the 280 REGISTERS, PALLETTE, CRTC REGISTERS & SYSTEM INFORMATION. Leave well alone if you know nothing about this, as Tearaway will accept NO responsibility, if you mess up your 'Software or Hardware'. Now Tearaway can deal with 128K games or programs, you save the game/program using the "C" option, (clear banks) with your Multiface as a 64K saved program. Tearaway can then look at it as it uses the EXTRA banks of any program over 64K to over write it.

Just to RE-CAP, the Utilities are the same as on other disc's, but in my opinion, **YES WE KNOW PETER.** Tearaway is THE BEST.

Worth the money 'YES IT IS'

PETER

REVIEW PROCOPY

Now that the 'BONZO' suite of programs have been entered into the Public Domain, I thought that I would do a little article on the Disc Copier program, **CPC PROCOPY**

Back in 1989 when it was released by 'NEMESIS' at 2-50 on disc, it was considered to be the copy program to get past any Disc Copy Protection. It is quite a good little program with lots of Utilities on the same disc. For example....Formatting, Disc mapping etc....

MAPPING a Disc is somewhat different to other mappers, Instead of all the tracks and sectors, where each file is kept and you get a screen full, Procopy prompts for the track that you wish to examine, it will display technical information such as the number of sectors, sector headers and gap #3 byte, one track at a time.

There are two formatting choices, Amstrad 178 K DATA, and 169 K VENDOR, never heard of VENDOR FORMAT ?, well as you know CP/M is copy right of LOCOMOTIVE, so in order to send SYSTEM CP/M programs as from a PD library, VENDOR format was used to get around it.

The early version of CPC PROCOPY, came with MINIDOS which had a set of useful utilities to use with CP/M. The copy that I have hasn't got it on so I can't comment on what 'Minidos' was like.

'THE COPY' function is a Disc to Disc file copier with the usual ? and * wildcards permitted.

'THE ERASE' is self explanatory, but, **'THE KILL'** is some what different.

As you know, when a file is erased from the disc, it's directory entry is modified, but the file is left intact. (put into USER AREA 229). When the KILL command is used, you kiss good by to it, lost for ever, so if using the KILL command, be sure you don't want the file again.

'UNERASE' (WILL) resurrect the any erased file.

'R/O & R/W' will allow any file to be read-only or to read-write. similarly, **'SYSTEM'** will hide the file from the directory.

'PROCOPY' has a good facility to **'ARCHIVE'** a Disc to Tape and to recover the files back again. **'BUT IT IS NOT A TAPE TO DISC COPIER'**

IT'S IN THE LIBRARY FOLKS, as with the other 'BONZO' programs, on the other side of the disc, is **'MAXIDOS'**

WOULD I RECOMMEND THIS UTILITY ? YES

75 % DAVE)))....

THE COOK REPORT

THE CHRISTMAS COMPUTER SHOPPER SHOW.

Being jinxed out of production is not every fanzine's greatest wish. But CPCSW has never done it before, so I thought that a jinxed article or two may come in handy some day, hence this one. It's not strictly CPC, but it is computer related.

On Sunday the third of December, the day I should have been madly studying for my Business Studies exam, I went to London. Why did I go to London? To see the shops and beautiful Christmas lights? Perhaps, to see Rob Buckley or Richard Widley (surely a waste of Diesel)? No. I went to OLIMPIYA (I can't even spell it now, somebody help me) (TRY OLYMPIA-Dave)))....(TA). And I went to OLYMPIA because there was a Computer Shopper Show on there.

At this show, there promised to be hundreds of bargains. There were quite a few. We (I dragged my Dad along because he had the money) Left about half past two, and sat waiting for a train service that didn't run on Sundays. A while later we saw all these smiling people coming out with brand new HEWLETT PACKARD 660 colour Ink Jet Printers. When we asked them, they had been reduced to about £180, from well over £300. Had we gone back in that Hall to claim the Discounts we had missed out on, we would have spent quite a few Hundred pounds we hadn't got.

It's always the same. I drag along Dad to places I get FREE tickets for, (*The Future Entertainment Show was one, but that is another story*), and he drags me along to places where he is likely to spend money. I always remember walking around Computer Fairs seeing Dad's eyes light up at something. I then feel like the parent saying "NO" to the excited child at Christmas time. I feel like the parent quite a lot with him actually, I even put his socks on for him, but again, that's another story. (*I am so glad that Dad doesn't vet my articles before going to print*).

Anyhow, the Computer Shopper Show was not all that great. It was just the same OLD companies hauling out products and trying to flog them to the same OLD audience. Was it a good day though? Well, I got to drive to Dorking Station, I like driving. I've just passed my test you see (*I don't yet know how*), so driving at speed is a bit of a novelty. "Exactly how much over the speed limit were you doing Angela?" asked a panic stricken Dad.....Up there I met a bloke called Ben Howard. He works in advertising on a magazine called PC MART (which is why I went up there in the first place).

I also liked coming back, because it was dark. I like travelling in the dark. My Dad and I, had a nice quite meal at the Little Che, which we enjoy doing, as we don't get to do it often.

CONTINUED.....

And that was it. I haven't finished the rest of the day yet. I have written the review for PC MART, wrote one on CPC PD for them, that was due a week ago, written this....but I have a rather nice warm milky huge mug of coffee by my side, and am about to make a phone call, so the day will probably turn out good, even if I was supposed to be swotting today. my driving has given my Father grey hair (Mind you, it won't notice much against the copious amounts he already has).

Angela Cook.....

BONZO'S BIG BATCH

What is it ? "What you see is what you get", and what you get is three programs - 1. Database . 2. Pools predictor. 3. Sprite and Screen designer.

DATABASE

The Data manager is a simple database program that will hold a maximum of 500 records in memory at once.

There are two field types, 'Up to 55 characters in length, and up to 20 fields in each record'.

Entering details is simple, and any mistakes are easily put right, and once you have set up the structure, you can save to disc and re-run from within the program to amend or add to the files.

You can also get a print - out of your files, a very easy program to use, ideal for club membership details etc.

POOLS PREDICTOR

Want to win on the Football Pools ? Try this little

program to select lucky **LUCKY NUMBERS**. If there is such a thing.

What you have to do is to enter details of the teams, number of Games played, won, drawn, etc, and hopefully it will predict for you the '**DRAWS, WINS, and AWAY RESULTS**', put your little "X's" on the coupon and await the cheque to drop on your door mat....Good Luck.....

SPRITE - SCREEN DESIGNER

This program is very handy if you know about machine programming, 'That counts you out Dave...Dave)))...'

Screen designer is fun to play with, even I got a screen to look quite good, 'well I thought so...Dave)))...', the screens are saved as normal 17 K screen size, a good little program if you know what your doing.

So is **BONZO'S BIG BATCH** any good and worth having ?.

Yes I think so

Do I Have It In The Library - 'YES'.

Rated 55 x

Dave)))

AMSTRAD ACTION MAGAZINES

Dave (me) is having a clear out, NO I AM NOT LEAVING
THE CPC. (Boot Sale Bargains).

I am offering the following 'Amstrad Actions' at

ISSUE 65

ISSUE 105 to 117. (SOME WITH COVER TAPES).

First come first served , (as they say)

2 X 1st class stamps apply to the UK ONLY.

the ED....

TIPS FROM ALAN

In a past issue,there was a
project instruction on how to
fit a switch to the Multiface
cable to make it invisible.

I would like to pass on this
littleTIP,that members may or
not know,which I think is
easier.

1. Hold down the STOP button
2. Press and release the RESET
button

3. Release the STOP button
4. Press "R" on the keyboard
nice little tip ALAN,thanks a
lot. I didn't know about that
one,did anyone else ???.

any more tips ??????????????????

REVIEW BY DAVE

Do you need to keep some sort
of control of your MONEY. ??.
YES..then I have a nice little
program in the library,very much
like the 'MONEY MANAGER' program.

It is named 'BANK MANAGER'.
One of the best things about this
'bank Manager' is,HE/SHE doesn't
say "NO".
or write you nasty letters,when
you overdraw on your account.

You can input all your Weekly
/ Monthly outgoings,-standing
orders etc,even work out months
in advance,how your spending is
going.

75 %

Some of you may have read about ' RADICAL ' pulling the Plug on the
CPC.

And the much awaited " MAGA BLASTERS " has been withdrawn due to
coding problems. But on the good side for PLUS OWNERS, ' SMART + and
FLUFF ', has been entered into the Public Domain. I wonder how long it
will take someone to program a patch so it will work on the 6128.

NOTE. DO NOT CONTACT " SIREN SOFTWARE ". they have sold all there CPC
related items,and therefore will only return your order, Try Peter
Campbell of " COMPSOFT " instead.

Dave))).....

ODD'S & SODD'S

I have been asked to clarify one or two points to a NEW MEMBER, JOHN from Tavistock has asked me, (HOW IS IT THAT WHEN I CAT A DISC, IT ONLY SHOW'S 3 FILES THAT TOTAL 100K, yet there is only 3K left on the disc ???) doesn't the disc have 178 K of space ???????????

The answer John is that there are a lot of files on the disc that are HIDDEN from you and don't show up when you do a cat of the disc, clever isn't it???? . If you have PARADOS ROM or some other good rom fitted, you will see what I mean when you log in a disc , those that are hidden are high-lighted, now you can of course change them to READ & WRITE to your screen by altering the ATTRIBUE'S (a big word there for you Dave....Dave)))... This one always use to get me when I first started computing John ...I could never understand how three files that total 100 K can only leave 3 K un-used when the disc suppose to have 178 K of space...Dave >>>...

Poor Arthur was having problems with his set-up, he couldn't read some disc's that I sent him, after Hours of prodding around with his trusty AVO Meter, he eventually traced the fault to the 12 V lead from the MONITOR. it was giving him an INTERMITTENT fault. (another long word Dave...Dave>>>...)..so it just goes to show, it is NOT always your disc or the drive to start swearing at . NICE ONE Arthur, I have never come across that one my self before....

MERVIN ask's, DO I REALLY NEED A SIDE SWITCH?????. the answer Mervin is yes and no. BUT as your set-up doesn't have any large format Rom's connected, and NO ABBA or any other singing group switch,. I would suggest that you get your self a side switch.

The question came about because Mervin wanted some PD from me, and most of the PD disc's have two sides, Mervin does have a 3.5" drive fitted and he sent me the 3.5" disc's to copy onto, so without a large format facility or a side switch, I had to use two disc's formatted to 178 K only for two sides of PD, now I know these disc's are cheap compared to 3" disc's, but for ease of use, I would certainly fit a side switch to cut down on the number of disc's needed.
