

Manual for "The Wrath of the MCPC"

(C) 2021 by Michael Wessel

This is a single player game. You will be playing against a sophisticated AI. **No manual is required.** This is a **game for casual players.** Note that the game is played on a **torus**, i.e., the play field wraps around at the corners. The MCPC will place random obstacles on the field; these need to be avoided. The eyes of the MCPC are deadly, but it's vector lines can be safely crossed. The AI player is using a much more clever scheme than "random" driving as you will see! You can teleport yourself out of tricky situations three times. Good luck!

Key bindings:

- **CURSOR KEYS: Up, Down, Left, Right.**
Note that you cannot make 180 degree turns!
- **SPACE BAR: TELEPORT.**
You can teleport 3 times per game.

Enjoy!
