The Game:

Many have tried to rescue the power jewels from the creepy mansion on the top of the hill. None have lived to tell the tale. Now it is up to you to try to wrest the treasure from the mansion's deadly inhabitants. Run through the Spectre's Lair, Horrid Hall, the Spider's Parlour and Death Tower. Leap over the poison-smeared spikes, scamper along the moving platforms and contracting floorboards, run past bouncing spiders, and use the powerful springs to propel you onto overhanging ledges.

Consuming the yellow titbits earns you extra points and eating a stray power jewel causes the ghost(s) to disappear for about 15 seconds. A bonus score in the top right hand corner of the screen counts from 50 down to zero. If you don't reach the top of the screen within this time limit you lose a life.

You start with 4 lives. An extra life is awarded every four screens.

Game Controls:

Plug in a joystick or use the following keys:

'P' pauses the game and 'O' resumes play.

Pressing ESC during the game returns you to the hi-score table. Press ESC here to return to the instructions.

If you have any problems:
